

Prof. Jerome Waser, EPFL Lausanne, Switzerland

Title: Cyclic Hypervalent Iodine Reagents: A Treasure of Reactivity for Organic Synthesis

Professor Jerome Waser was born in Sierre, Valais, Switzerland in 1977. He studied chemistry at ETH Zurich and obtained his Diploma in 2001. From 2002 to 2006, he was a PhD student at ETH Zurich with Prof. Erick M. Carreira. In 2006, he joined Prof. Barry M. Trost at Stanford University as a SNF postdoctoral fellow. From October 2007 to May 2014, he was a tenure-track assistant professor at EPFL Lausanne (EPFL). Since June 2014, he has been associate professor at EPFL, focusing on the development and application of catalytic methods for the synthesis of bioactive compounds. He is a recipient of the A. F. Schl fli award of the Swiss Academy of Sciences 2011, the ERC starting grant 2013, the Werner prize of the Swiss Chemical Society 2014 and the Springer Heterocyclic Chemistry Award 2016.
